---

To whom it may concern,

I am writing to express my support to the Eklutna Hydro Project proposed mitigation efforts to allow great salmon spawning on the Eklutna River. I know there are many challenges associated with the equitable use of this resource; however, I believe the proposed path forward is the best to allow for the most wide cast use of the Eklutna River. As a resident of Anchorage, the drinking water and power the Eklutna Reservoir provides is vital to a continued sustainable life in South Central Alaska. Please have my greatest thanks for the hard work of the project team on developing this mitigation plan.

Thanks,

Aidan I. Blum (He/Him)
