---

Please do not give any consideration to the Anchorage Assembly's poorly thought out desire to remove clean hydroelectric power from your portfolio. I hike Thunderbird Falls trail every year and have yet to see any salmon there that would justify losing a strong, paid for piece of infrastructure that provides clean electricity for the area. Install a fish ladder if you must, but don't hurt the community by removing this resource, especially after the recent weather conditions we experienced.

Thank you,  
Britton Goldberg
