Subject: Eklutna Generation
Date: Saturday, February 17, 2024 3:38:16 PM

I am from Alaska and an engineer involved in the energy industry for over 40 years. I believe it is unwise to remove the Eklutna power generation facilities. Although I do enjoy fishing, I do realize the benefit of having hydropower. It's already in place, truly renewable energy, and it is very cost effective contribution to keeping our power rates low. It would take 3 Fire Island wind farms to replace the annual capacity at a much higher costs.

Please do not remove this resource.
